Classification of Rakuten e-commerce products

Relevant training course: Data Scientist

Level of difficulty: 10/10

Description of the project:

Cataloging products according to different data (texts and images) is important for e-commerce since it allows for various applications such as product recommendation and personalized research. It is then a question of predicting the type code of the products knowing textual data (designation and description of the products) as well as image data (image of the product).

Resources to refer to:

- **Data:**
 - This project is part of the Rakuten France Multimodal Product Data Classification challenge, the data and their description are available at: <https://challengedata.ens.fr/challenges/35>
 - Text data: ~60 mb
 - Image data: ~2.2 gb
 - 99k data with over 1000 classes.

Validation conditions for the project:

- an exploration, data visualization and data pre-processing **report** ;
- a modeling **report** ;
- a final **report** and associated **GitHub**.
